

A15 · Model Card

THE INNOVATION CODEX TOOLKIT

Document an AI model so its behavior is transparent, auditable, and understandable to nonexperts.

Model / System Name

Version and Date

Intended Use

What it assists with, and whose judgment it does not replace.

Out-of-Scope Uses

Performance

Against the metrics that matter, with the evaluation set described.

Known Limitations

The failure modes a nontechnical reviewer most needs to know.

Ethical Considerations and Safeguards

Human-Oversight Path

How a person can override the system, and how overrides are monitored.

Owner

Review Trigger

Decision rule. A model goes live only with a documented human-oversight path and at least one named limitation. If no one can explain how the system fails or how a person can override it, it is not ready for the floor.
